HTS2 被阻擋會出現看板區『已取消瀏覽該網頁』

1.請於螢幕右下角諾頓 360 圖案上點滑鼠右鍵開啟

## 2.請於開啟畫面點『設定』

## 3.請點選『防火牆』

4. 點選『設定』

5. 點選『程式規則』

6. 捲動捲軸選取『JsShellClient』和『HtsCheck』以及『UpdateAgent』這三個應用程式

7. 三個應用程式依序都選擇『允許』

8. 點選『套用』

9. 按『關閉』後，允許防火牆通過 HTS2 後，重登 HTS2 即可

The screenshot shows the Norton Firewall settings window. The '設定' (Settings) tab is selected. The '程式規則' (Program Rules) section is active. A table lists several programs with their access permissions. The programs JsShellClient, HtsCheck, and UpdateAgent.exe are highlighted with a red box, and their permissions are set to '允許' (Allow). The 'JsShellClient' and 'HtsCheck' rows have a red box around the '允許' option in the dropdown menu. The 'UpdateAgent.exe' row has a red box around the '允許' option in the dropdown menu. The 'McAfee' program is also listed but not highlighted. At the bottom, the '套用' (Apply) button is highlighted with a red box, and the '關閉' (Close) button is also highlighted with a red box. Red circles with numbers 4 through 9 indicate the steps described in the text.
